References Category:Microsoft Flight SimulatorCulture, ethnicity, and practice variations in the treatment of pelvic inflammatory disease. To evaluate whether the treatment of patients with pelvic inflammatory disease (PID) is influenced by physician and/or patient factors, including race, socioeconomic status, education, insurance, and comorbid conditions. This was a retrospective cohort study of 1,816 patients treated for PID in San Francisco from 1990 through 1992. The cases were reviewed for demographic factors and clinical management. The type of treatment prescribed was categorized as surgical, medical, or no treatment; patients were then divided into four ethnic groups: black, Hispanic, non
