Bird mortality events are considered exotic disease threats in the tropics. We report a case of vesicular-type stomatitis in a Bali starling (*Sturnus malabaricus*) found dead in The Hague, the Netherlands. Necropsy examination revealed red, focal lesions in the oral cavity. Histopathology revealed a necrotizing granulomatous inflammation with intralosomal epithelioid cells and formation of granulomatous-necrotizing foci. Based on these findings, a presumptive diagnosis of stomatitis was made. Vesicular-type stomatitis is an endemic infectious disease of birds and is caused by herpesvirus 1. Although considered to be rare in birds, this case highlights the need for further investigation of stomatitis in wild passerine species in The Netherlands and other countries.Q: Switch git repository to another folder I have a project which I want to migrate to another folder. I want to switch from my old repository to the new one. Is it possible? Can I switch my old repository to a new folder? If yes, how do I do it? I'm using Windows 7, Visual Studio 2015 and C#. A: The way that I was able to do it was to make a clone of the old repository, then simply copy the files and overwrite the old repository. For those who have a better solution, please share. What's the matter with your voo-doo? Thursday Feb 14, 2017 at 12:01 AM Plans to broadcast live from a haunted town have met with a red face. By Troy Riggs Since the first of the year, the Arkansas Haunted Museum in the historic downtown square of Waldo has been receiving regular updates via a series of web sites that offer an interactive peek into the museum's history, its present, and its future. Visitors can now ask questions
