Lighting (LRL): Technical Aspects of the Solar Energy. 1-Dec-2014 ANSI/IES RP-5-00 2006, Standard Practice for Reflective Site-Maintenance Field. - General Field Site Maintenance Lighting Design Considerations . . Risks and Safety The LP-56-05 Guide for Field Lighting of Playfields and Baseball/Softball Parks is a generic guideline which does not apply to all baseball and softball fields. In addition, the LP-56-05 does not address the lighting of playgrounds, grade-level school sports facilities, playgrounds, and football/soccer fields. There are a number of additional considerations in the design of

---

these fields. The LP-56-05 provides a methodology for dealing with the following considerations: site characteristics, spectator traffic, quality of light from existing lights, incorporation of new lighting systems, and the protection of spectators. The LP-56-05 does not address lighting of playfields, playgrounds, and grade-level school sports facilities. There are a number of additional considerations in the design of these fields. Lighting of baseball and softball fields Control Tower Design Recessed Lighting Safety Seeking Rainbow Designed for Play Practical Considerations by John Slattery 4-Jun-2007

Category: Lamps

Efficient, highly selective heterogeneous catalysts are important for the development of clean, efficient and economical processes. In the area of air-oxidation chemistry, direct air oxidation of aromatic hydrocarbons is considered to be an alternative to traditional methods. U.S. Pat. No. 5,705,747 discloses a catalyst for the direct air oxidation of an aromatic hydrocarbon, comprising (i) a molybdenum salt of a perfluorinated carboxylic acid, and (ii) a bismuth or bismuth-containing component, both being dispersed on a carrier. U.S. Pat. No. 5,817,746 discloses a catalyst for the direct air oxidation of

---

aromatic hydrocarbons  
comprising a solid component  
having a Lewis acid activity and a  
carrier component having a  
Bronsted acid activity, wherein  
the solid component contains (i) at  
least one trivalent metal from the  
group consisting of Ti, V, Cr, Fe,  
Al, Zr, Nb, Mo, W and Te and (ii)  
a compound of a metal
