A: One of the main features of ZBrush is its user interface. By default, all you see is the control panel of the application. In order to change that, you need to use the help menu. So, choose Help, then it will give you a choice of help pages: Feature Selection page Brush List and Control Page Shape Selection and Naming Page Color Selection and Appearance Page Brush Tool Page Themes Page and much more You will notice that there is a Settings option in the top right of the main window. Go to the Settings option, then there is a search option where you can search for the word "Help". It will give you a list of help pages, you can then choose the one you want, by the index number in the list. Searching for Help will take you to this page: The default help page is "How to access help", you can change that to any help page you like by choosing the Help option as I showed above. I hope that helps! Study on early changes of monoamine content and biogenic amine-related enzyme activities in hippocampal CA1 area after kainic acid-induced convulsive seizures. To study the early changes of monoamine content and biogenic amine-related enzyme activities in the hippocampal CA1 area after convulsive seizures induced by kainic acid (KA). KA (50 mg/kg) was injected into the cerebral lateral ventricle of male SD rats, after which the animals were sacrificed at 15 min, 30 min, 1 h, 2 h, 4 h, 8 h, and 24 h and the hippocampal CA1 area was dissected. The levels of the neurotransmitters, monoamines, and their metabolizing enzymes in the hippocampal CA1 area at different times after KA-induced seizures were determined by means of high performance liquid chromatography (HPLC) and spectrophotometric methods. Compared with the control group, the norepinephrine (NE) content and the NE and dopamine (DA) metabolizing enzymes (tyrosine hydroxylase, TH; dopamine-beta-hydroxylase, DBH) in the CA1 area increased at 15 min, 30 min, 1 h, and 2 h, and returned to the control levels at 8 h and 24 h after seizures. The NE metabolizing enzyme (uptake and release) in the CA 2d92ce491b
