Category:Red Giant SoftwareThis application relates to a plasma jet generator and a method of operating such a generator for use in the treatment of gas streams. Plasma jet generators are well known in the art and generate a plasma by using high voltage to break a gas, such as an air stream, into a plasma. A plasma is a high temperature (about 10,000 degrees Kelvin), high energy (tens to hundreds of watts/inch), and low density (below that of air) gaseous (ionized) medium. The plasma jet is believed to be an efficient method for surface treatment of components, such as heating, cleaning, ba244e880a
