================= Use this tool to set the speed of most cdrom drives. You have to supply the host and target of the drive to set the speed of. Speed may be specified in either kilo or mega units. SlowCD Crack Mac Location: ================= /usr/local/sbin SlowCD Activation Code Usage: ================= Use this command to view the speed of the drive: /usr/local/sbin/SlowCD For Windows 10 Crack 0 0 Use this command to set the speed of the drive: /usr/local/sbin/SlowCD 2022 Crack 0 0 1764 If you omit the speed parameter you get some information about the drive. To exit the program supply the following command: exit NOTE: If you set the speed to lower then max on a drive that is currently being used for something else you might get a DOS/Windows "program is still running" message. This is normal, the drive will be released as soon as you stop the program. NOTE: On some drives when you enter 0 as the target the drive might return 0x7FFF as the speed. It's possible that this happens because the drive doesn't like to be set at zero speed. You might have to try out some other values.
