Visual LISP can be used to create apps for AutoCAD, for example MathDXL. VBA is a standard for scripting Microsoft Office applications. VBA is available as an add-on for AutoCAD, which also supports the development of other applications. AutoCAD also supports ObjectARX, a programming language created by the Autodesk team. The design and management of objects (e.g., blocks, components, and layers) is done in ObjectARX and the definition of scripts is done in VBA. An ObjectARX plugin for AutoCAD is available. VBA can be used to create macros and toolbars, as well as to automate common tasks. AutoCAD supports a number of APIs for customization and automation. These include AutoLISP, Visual LISP, VBA, .NET and ObjectARX. ObjectARX is a C++ class library, which was also the base for: products extending AutoCAD functionality to specific fields

creating products such as AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D third-party AutoCAD-based application There are a large number of AutoCAD plugins (add-on applications) available on the application store Autodesk Exchange Apps. AutoCAD's DXF, drawing exchange format, allows importing and exporting drawing information. Multiplatforms AutoCAD is natively available on the Windows platform.
