It will not work with. Here is error which I get when I try to delete the hyperv network switch driver. When I try to uninstall the driver, Windows say that the computer can not uninstall this driver . I am using windows 8.1. I don't have the problem in other Laptops. I tried to disable the

firewall. My internet is working well. But, I can not connect my pc to internet through my mobile. I want to uninstall the driver of hyperv network switch in order to connect my pc to internet. Can any one help me. I am using dell inspiron 6400. But I have no idea about the driver of network switch. How can I solve the problem? Please help me. Thank you!

A: There's no miniport driver available for your system (unless it's a virtual machine), so this is not going to work. If you're unable to install the driver, you need to install a version of Windows

that supports Hyper-V network virtualization, because your driver only supports Hyper-V network virtualization and can not work on a non-Hyper-V system. If you can't install that version of Windows, you can either try to update the system to a newer version, or, if you have an ISO of Windows 10 available, you can download the installation media and install from that. Posted October 15, 2014 at 1:08 am Neat. We have to find a way to go back to the present. I've had a plan all along. And a LOT of filler. Anyone here familiar with

Yogi Berra? He's the baseball great who said, "Nobody goes there anymore. It's too crowded." In a sense, it's always too crowded in a certain situation. I tried to do an issue two, but I was so busy with other things I'm 4bc0debe42
