Stealth Launcher is a freeware useful software for Windows, designed to help you create shortcuts on your desktop or to organize them into folders. The PC enhancer works perfectly in the two systems, and you can create as many shortcuts that you want, which means that you can relocate them on your desktop and keep them easily accessible. You can save them to a convenient location on your drive, creating shortcuts to folders or organizing them into groups or folders. You may also add these shortcuts to a favorites list and use them easily for the rest of the desktop. The more attractive this feature is, the more useful the tool will be for you. You can create shortcuts to your favorite websites, put them into your Internet browser or create a shortcut to just one of the web pages, which will immediately be placed on your desktop. Also, you can create shortcuts to your Internet radio stations, add them to a playlist and have them ready for use at anytime. All you need to do is choose the desired shortcut and setup the title and the URL of the web page, website or other document you want to add it to. The program will then ask you to input the corresponding path and file name of the target resource. The shortcut can be placed on your desktop, optionally within a folder. You can also store it in one of the predefined locations or on your own drive to save time. Other features included in Stealth Launcher are also quite impressive. For example, you can choose the size of the shortcuts, the response time and frequency, as well as the alignment of their frames. Besides, you can quickly move them, change the order they are stored in or clear up your desktop completely by right-clicking the container you want to remove. Also, the software is easy to use, so you can easily handle it, regardless of your experience with computers.
